

## Educator Project Requirement for Level 2 Certification

If you are a teacher or instructor, you need to submit a lesson plan detailing how you will use, or better yet, have used Texthelp software with students. At a minimum, this will need to include the standards/objectives, topic and subject being taught, the way you will use the software to help deliver the lesson (if applicable), and the way students may use the software to help demonstrate their knowledge of the lesson. A basic template has been provided. Additional files such as screenshots and student work samples are encouraged.

Please answer the following in an attached document:

1. What Texthelp software are you using?
2. What objectives/standards will you address during this lesson?
3. In what ways will you use the software to help teach content to students?
4. In what ways will students use the software to demonstrate their knowledge of the content and/or skill?
5. What was the reaction of the students to the lesson? What are the next steps for building on what was learned in this lesson?

Please send attachments of student examples and/or screenshots of materials used.

When you have completed your project, please send it, attachments and **a copy of your valid Level 1 certificate** to Jackie Prentice at: [certification@texthelp.com](mailto:certification@texthelp.com)

**Please Note** - by submitting a project for the Level 2 certification, you are giving Texthelp permission to use your project for training and marketing purposes, including but not limited to, promotion via our social media channels & website.
