

Assessor Project Requirement for Level 2 Assessor Certification

As an assessor, you are to submit five examples, in a table, of how the features in Read&Write or EquatIO can benefit someone who you are assessing. Include the background of the student so as to outline why the use of the software is relevant. In the table choose 5 features and outline how you will explain, or better yet, have explained that feature during an assessment. Include the specific benefits you believe that feature will have for the person.

Please include the following in your document:

1. The background of the student (please use an alias name) that makes receiving the software relevant, e.g. DSA student, Access to Work, learning needs identified, dyslexia etc., any additional relevant information such as ELL.
2. A table with 5 features listed in the left column and how you explain each feature and its benefits in the right column.

When you have completed your project, please send it, attachments and **a copy of your valid Level 1 certificate** to Jackie Prentice at: certification@texthelp.com

Please Note - by submitting a project for the Level 2 certification, you are giving Texthelp permission to use your project for training and marketing purposes, including but not limited to, promotion via our social media channels & website.
